HIGH PERFORMANCE COATINGS

High Performance Coatings For Tank Containers

Our Tank Container Coatings

- ChemLINE® 784
 - ChemLINE® 784 AS (Anti-Static)
 - ChemLINE® 784 ES (Elevated Service)
 - ChemLINE® 2400 (Abrasion Resistant)
-
- PROCO - EMAIL®
-
- Proco - ECTFE Halar® liquid
-
- Proco - L (F14E)
 - Proco - A (F17E)
-
- Plasite®
-
- ... and more - please contact us

Quality

At HÜNI+CO quality comes always first. That is not only being reflected in our DIN EN ISO 9001 certified quality management system that we maintain since 1996 but also in the broad range of quality tests and inspections that we perform before, during and after each coating process.

Quality tests and inspections.

- Measurement and documentation of the roughness profile
- Process-accompanying monitoring and documentation of important environmental conditions
- Logging of curing temperatures throughout the whole process
- Measurements of layer thickness
- Spark testing with high voltage in accordance with DIN 55670-A
- Testing and recording of the electrical conductivity
- Issuing of work certificates / Factory certifications according to DIN EN 14879-2

Pre-treatment.

- Various blasting systems for corundum and glass bead blasting
- Standard blasting profile Sa3 according to DIN EN ISO 8501-1
- Pyrolysis
- Thermal degreasing
- Chemical pre-treatment

Our capacities.

- Eleven firing and sintering furnaces up to 500°C
- Maximum dimensions for components to be coated: 3.10 x 3.10 x 10 meters
- Unit weight up to eight tonnes

Service - our way of work.

Service is a top priority for us. We are driven by the goal of finding the best and most sustainable surface solution for our customers.

- Sample coating
- External priming and final coating
- Mechanical processing
- Repairs
- Training
- Logistics

We have been one of the world's leading suppliers of interior coatings for ISO tank containers for over 20 years. As pioneers in this market segment, we see ourselves as consultants and partners to the chemical and logistics industries and are very familiar with the special quality requirements of these sectors.

The comprehensive professional advice from our experts regarding a coating-compliant design, which is valued by customers worldwide, plays a central role here - as does a comprehensive test of chemical resistance.

TC Coatings Repair Shops

To give our customers the best possibility to provide service in the maintenance and repair of damages to these high-performance coatings, we qualify selected tank container service and repair depots at home and abroad. Please find all TC Coating Repair Shops here:

TC Care by HÜNI+CO

Especially with high-performance coatings such as ChemLINE® 784 and PROCO - EMAIL® correct handling and cleaning is of paramount importance to avoid damage. We provide all customers with detailed care and handling information. Instructions for cleaning and handling can be found here:
